ABOUT THE FUND

Subfunds Emerytura are so-called target date subfunds designed to meet the needs of Employee Capital Plans participants. The proportion of what they invest in changes gradually over time. The longer until the date specified in the subfunds' name, the greater the weight of equity instruments (e.g. shares). Over time, their portion decreases in favour of debt instruments (e.g. bonds).

HOW WE MANAGE

- At the initial stage of the subfund's operation, we invested up to 70% of its assets in equity instruments. As we approach the target date (2035) and beyond, even up to 100% of assets will be invested in debt instruments,
- we invest in debt and equity instruments both directly and through other Polish and foreign funds,
- the proportions between asset classes will gradually change. We will not make it dependent on the current and projected developments in the markets. What matters is how much time remains to reach the date defined in the subfund's name,
- the subfund is actively managed and has no benchmark.

INVESTMENT RISK

The risk profile is determined based on the methodology used in the Key Information Document (KID) and is current as at the date of this Factsheet. Historical data used to assign the risk category cannot predict the future risk profile of the fund. The fund objective does not include achieving the relevant risk category. The risk and return profile may change in the future. The lowest risk category [1] does not mean risk-free investment.

FOR WHOM

This subfund is for those who:

- intend to terminate their investment close to the subfund's target date, i.e. in 2035. It is therefore designed for PPK participants born between 1973 and 1977,
- expect returns higher than bank deposits,
- accept a medium-low risk class of the subfund,
- reconcile with the possibility of noticeable fluctuation in the value of their investments, especially in the short term, including the risk of losing some of the amount invested.

GLOSSARY

FUND

"Fund" is a common term used to describe various forms of collective investment, including "sub-funds", which are part of our umbrella funds.

PARTICIPATION UNIT

The fund "issues" participation units to investors. They confirm the right to a certain part of the fund's assets and the exercise of other rights arising from participation in the fund. The value of a unit is determined by dividing the value of the fund's assets by the number of units held by all participants.

SFDR CLASSIFICATION

SFDR is Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector. SFDR includes a system of classifying investment products into one of three categories depending on the approach to sustainability issues. In Goldman Sachs TFI, products classified in accordance with Article 6 integrate sustainability risks into the investment process, products complying with Article 8 promote environmental and social aspects, and products classified in accordance with Article 9 have as their objective sustainable investments.

MANAGEMENT FEES

A fixed management fee is the basic remuneration charged by an asset manager for managing a fund. It is set as a percentage charged on the assets of the fund under management on an annual basis. Some companies may also charge a variable fee if the conditions are met in the form of the manager achieving a certain level of performance measured in relation to a specific reference point (e.g. benchmark).

BENCHMARK

A reference index that helps evaluating fund management performance. The following may serve as a benchmark: stock market index, yield of specific treasury instruments or their combinations.

PARTICIPATION UNIT CATEGORY

The participation units of our funds may be available in different categories. They differ in the method and size of fees charged. The basic one is category "A", but there are also those that are sold under employee programs or individual pension accounts.

RATING OF ANALYZY ONLINE

A comprehensive assessment of the fund by an independent analytical firm. The assessment consists of both quantitative parameters (e.g. effectiveness of the fund, repeatability of results, maximum capital drawdown) and qualitative parameters (e.g. the company's market position, transparency or human capital). The result of this analysis are stars (from one to five). The more of them there are, the better the quality of the fund.

DISTRIBUTION FEE

This fee is the distributor's remuneration for intermediation in the sale of shares. It is set as a percentage charged on the amount deposited by investors. The amount of the distribution fee varies from distributor to distributor and usually decreases as the amount of capital paid into the fund increases.
