### ABOUT THE FUND

Goldman Sachs Obligacjii Plus is a fund with an investment policy that allows to take advantage of volatility in the debt market, therefore the duration (weighted average time to maturity of the portfolio) may be negative. The majority of the portfolio is allocated to Polish debt instruments. Primarily these are bonds issued or guaranteed by the State Treasury. The portfolio is complemented by Polish corporate bonds and foreign bonds. The fund promotes environmental or social aspects as outlined in Article 8 of the SFDR regulation.

### HOW WE MANAGE

- We invest at least 15% of the fund's assets in instruments issued, guaranteed or underwritten by the State Treasury,
- up to 85% of the fund's assets may be invested in non-government debt instruments,
- under the terms of the prospectus, we may also invest in other financial instruments, including foreign government bonds, Polish corporate bonds or derivatives,
- in this fund we do not invest in stocks,
- the fund is actively managed. Its purpose is not to mirror its benchmark. Its benchmark is used by us to evaluate the performance of the investment and calculate the performance fee.

### INVESTMENT RISK

The risk profile is determined based on the methodology used in the Key Information Document (KID) and is current as at the date of this Factsheet. Historical data used to assign the risk category cannot predict the future risk profile of the fund. The fund objective does not include achieving the relevant risk category. The risk and return profile may change in the future. The lowest risk category [1] does not mean risk-free investment.

### RECOMMENDED MINIMUM INVESTMENT HORIZON

### FOR WHOM

This fund is for those who:

- want to invest for no less than 2-year period,
- expect returns higher than bank deposits,
- do not accept the risks associated with investing in stocks,
- accept a low risk class.

**Worth to know:** you can read more about Goldman Sachs Obligacjii Plus in the prospectus, key information document and disclosures related to sustainability issues. We publish all mentioned documents at [www.gstfi.pl](http://www.gstfi.pl).

Until July 19, 2020, the fund operated under the name NN (L) Krótkoterminowych Obligacjii Plus. The returns achieved until that date are the effect of pursuing a different investment strategy than the current one.

## GLOSSARY

---

### FUND

---

"Fund" is a common term used to describe various forms of collective investment, including "sub-funds", which are part of our umbrella funds.

### PARTICIPATION UNIT

---

The fund "issues" participation units to investors. They confirm the right to a certain part of the fund's assets and the exercise of other rights arising from participation in the fund. The value of a unit is determined by dividing the value of the fund's assets by the number of units held by all participants.

### SFDR CLASSIFICATION

---

SFDR is Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector. SFDR includes a system of classifying investment products into one of three categories depending on the approach to sustainability issues. In Goldman Sachs TFI, products classified in accordance with Article 6 integrate sustainability risks into the investment process, products complying with Article 8 promote environmental and social aspects, and products classified in accordance with Article 9 have as their objective sustainable investments.

### MANAGEMENT FEES

---

A fixed management fee is the basic remuneration charged by an asset manager for managing a fund. It is set as a percentage charged on the assets of the fund under management on an annual basis. Some companies may also charge a variable fee if the conditions are met in the form of the manager achieving a certain level of performance measured in relation to a specific reference point (e.g. benchmark).

### MODIFIED DURATION

---

A measure of the sensitivity of bond prices to changes in market interest rates. The longer the average maturity of bonds in the fund (i.e. the longer the modified duration), the higher the sensitivity. When market interest rates go up, bond prices will fall, and vice versa.

### BENCHMARK

---

A reference index that helps evaluating fund management performance. The following may serve as a benchmark: stock market index, yield of specific treasury instruments or their combinations.

### PARTICIPATION UNIT CATEGORY

---

The participation units of our funds may be available in different categories. They differ in the method and size of fees charged. The basic one is category "A", but there are also those that are sold under employee programs or individual pension accounts.

### RATING OF ANALYZY ONLINE

---

A comprehensive assessment of the fund by an independent analytical firm. The assessment consists of both quantitative parameters (e.g. effectiveness of the fund, repeatability of results, maximum capital drawdown) and qualitative parameters (e.g. the company's market position, transparency or human capital). The result of this analysis are stars (from one to five). The more of them there are, the better the quality of the fund.

### DISTRIBUTION FEE

---

This fee is the distributor's remuneration for intermediation in the sale of shares. It is set as a percentage charged on the amount deposited by investors. The amount of the distribution fee varies from distributor to distributor and usually decreases as the amount of capital paid into the fund increases.

### YIELD TO MATURITY (YTM)

---

Expected annual return on investment in the bond, assuming that it is maintained until maturity. The yield of the fund's portfolio is, in turn, the resultant of the yields of all bonds included in it.

As part of our investment process, we may integrate ESG factors alongside traditional factors. The identification of a risk related to an ESG factor will not necessarily exclude a particular investment that, in our view, is otherwise suitable and attractively priced for investment, and we may invest in an issuer without integrating ESG factors or considerations into our investment process. Moreover, ESG information, whether from an external and/or internal source, is, by nature and in many instances based on a qualitative and subjective assessment. An element of subjectivity and discretion is therefore inherent to the interpretation and use of ESG data. The relevance and weightings of specific ESG factors to or within the investment process vary across asset classes, sectors and strategies and no one factor or consideration is determinative.
