ABOUT THE FUND

Goldman Sachs Obligacji is one of the oldest bond funds in Poland. Most of the portfolio is placed in medium- and long-term debt instruments issued by the State Treasury.

HOW WE MANAGE

- We invest at least half of the fund's assets in instruments issued, guaranteed or underwritten by the State Treasury,
- Under the terms of the prospectus, we may also invest in other financial instruments, including foreign government bonds or derivatives,
- in this fund we do not invest in stocks,
- the fund is actively managed. Its purpose is not to mirror its benchmark. Its benchmark is used by us to evaluate the performance of the investment and calculate the performance fee.

FOR WHOM

This fund is for those who:

- want to invest for no less than 3-year period,
- expect returns comparable to those of bank deposits,
- do not accept the risks associated with investing in stocks,
- accept a medium-low risk class.

Worth to know: you can read more about Goldman Sachs Obligacji in the prospectus and key information document. We publish both documents at www.gstfi.pl.

INVESTMENT RISK

The risk profile is determined based on the methodology used in the Key Information Document (KID) and is current as at the date of this Factsheet. Historical data used to assign the risk category cannot predict the future risk profile of the fund. The fund objective does not include achieving the relevant risk category. The risk and return profile may change in the future. The lowest risk category [1] does not mean risk-free investment.

GLOSSARY

FUND

"Fund" is a common term used to describe various forms of collective investment, including "sub-funds", which are part of our umbrella funds.

PARTICIPATION UNIT

The fund "issues" participation units to investors. They confirm the right to a certain part of the fund's assets and the exercise of other rights arising from participation in the fund. The value of a unit is determined by dividing the value of the fund's assets by the number of units held by all participants.

SFDR CLASSIFICATION

SFDR is Regulation (EU) 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial services sector. SFDR includes a system of classifying investment products into one of three categories depending on the approach to sustainability issues. In Goldman Sachs TFI, products classified in accordance with Article 6 integrate sustainability risks into the investment process, products complying with Article 8 promote environmental and social aspects, and products classified in accordance with Article 9 have as their objective sustainable investments.

MANAGEMENT FEES

A fixed management fee is the basic remuneration charged by an asset manager for managing a fund. It is set as a percentage charged on the assets of the fund under management on an annual basis. Some companies may also charge a variable fee if the conditions are met in the form of the manager achieving a certain level of performance measured in relation to a specific reference point (e.g. benchmark).

MODIFIED DURATION

A measure of the sensitivity of bond prices to changes in market interest rates. The longer the average maturity of bonds in the fund (i.e. the longer the modified duration), the higher the sensitivity. When market interest rates go up, bond prices will fall, and vice versa.

BENCHMARK

A reference index that helps evaluating fund management performance. The following may serve as a benchmark: stock market index, yield of specific treasury instruments or their combinations.

PARTICIPATION UNIT CATEGORY

The participation units of our funds may be available in different categories. They differ in the method and size of fees charged. The basic one is category "A", but there are also those that are sold under employee programs or individual pension accounts.

RATING OF ANALYZY ONLINE

A comprehensive assessment of the fund by an independent analytical firm. The assessment consists of both quantitative parameters (e.g. effectiveness of the fund, repeatability of results, maximum capital drawdown) and qualitative parameters (e.g. the company's market position, transparency or human capital). The result of this analysis are stars (from one to five). The more of them there are, the better the quality of the fund.

DISTRIBUTION FEE

This fee is the distributor's remuneration for intermediation in the sale of shares. It is set as a percentage charged on the amount deposited by investors. The amount of the distribution fee varies from distributor to distributor and usually decreases as the amount of capital paid into the fund increases.

YIELD TO MATURITY (YTM)

Expected annual return on investment in the bond, assuming that it is maintained until maturity. The yield of the fund's portfolio is, in turn, the resultant of the yields of all bonds included in it.
